SOFTWARE DEVELOPER

I am passionate about solving complex problems, enhancing user experience, and developing innovative solutions. I am always eager to learn new technologies, collaborate with diverse teams, and contribute to the mission.

SKILLS

Frontend : ReactJs , AngularJs , React Native , Redux , NgRx , RxJS , HTML , CSS , Tailwind , Bootstrap

Backend : NodeJs , NestJs , Sequelize , SQL , Express

DevOps: Docker , Kubernetes (Beginner), ArgoCd (Beginner) , Git Action

Programming Principles: Solid Principles , Design Patterns

Languages: TypeScript , JavaScript , HTML , CSS , Python

Familiarity: OpenAI API , CloudFlare Workers, RAG , LaMDA 2 API model , Prompting , Flask

OPEN SOURCE CONTRIBUTION

Parseable Console (React JS + TypeScript):

- [Fix the role update update and sync issue](#)
 - [Created the issue for search reset](#)
-

EXPERIENCE

ProqSmart , Bangalore

Feb 2023 - Present

Frontend Lead & DevOps Developer

- Led a **nuclear startup** as the sole frontend developer in a 3-4 member team.
- Successfully **transitioned the platform API** from Django to Frappe API.
- Spearheaded the **standardization** of **coding practices** and CSS, emphasizing the **use of types** and interfaces for improved code quality.
- Implemented a robust **automation pipeline** through **GitHub Actions**, streamlining development processes.
- Pioneered the integration of **ngRx**, reducing frontend load time from 5 seconds to 500 milliseconds, significantly enhancing overall platform **performance by 10x**.
- Create an **AI pipeline** using ChatGPT to categorize unstructured **Construction item details** into custom categories, utilizing Python and the OpenAI API.
- Design a **new app architecture** using the **NX workspace** setup to house multiple applications, sharing common components across them. These components should be organized in multiple libraries, with **Storybook integration** for component documentation and **Tailwind CSS** for styling, all managed within a single repository.

Wisflux , Jaipur

May 2022 - Dec 2022

Full Stack Developer

- Executed a **project for BOSCH** aimed at optimizing the assembly line process for staff.
- Utilized **React JS** for the frontend, enhancing user interface , interactivity and testing using **Cypress**.
- Implemented **NestJS** for the backend, ensuring a robust and efficient system for seamless data processing.
- **Leveraged Electron** to convert the application into a desktop solution, improving accessibility and usability for assembly line personnel.

ImagineSoftware , (Remote)

Aug 2020 - Sep 2020

Software Developer Intern

- Worked on job search portal using PHP , JavaScript and Linux and learned SCRUM

Cryptsy, (Remote)

Jan 2020 - Feb 2020

Software Developer Intern

- Developing and Maintaining the code - <https://github.com/CryptsyTV/Streamingapp>
-
